

# Porto Collection

## Upcycled calf leather

The material we use for the Porto rug is upcycled calf leather. We receive this leather in the shape of off-cuts from the production of luxury bags & accessories made in Italy by a renowned Italian luxury fashion house.

## Made in Portugal

Porto is handcrafted in a small town in the suburbs of Porto by a family run workshop with a tradition of fine craftsmanship.

## Designed in Denmark

The signature leather rug design we use to make Porto is a modern twist of the original leather rug with cotton fringes replaced by edges of smooth leather sewn onto each end of the rug, creating an elegant nordic finish.

## Limited by nature

We carefully select and sort off-cuts for each production batch. This means every production batch will come in a limited quantity of each design / color and may never return in stock due to the nature of our upcycled production method.

## Eco Dust Bag

Each Porto rug is delivered in a eco-friendly dust bag made of biodegradable material, which can decompose in nature in just 30 days. Compared to 1000 years for plastic. Use it to store your rug when you're not using it, or use it for other things such as storing off-season clothes or towels.
