Colours:

Artificial Leather - Outside

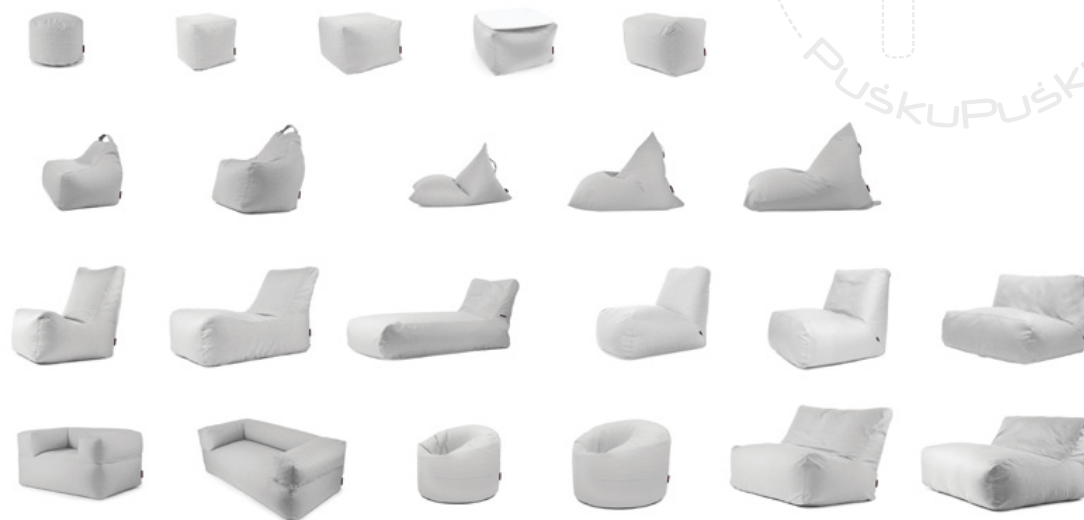

For Indoors and Outdoors!

Outside is a strong and durable artificial leather suitable for use both outdoors and indoors! Outside is a very practical material: it is easy to maintain, because any dust or dirt can be easily cleaned with a wet cloth. You can print extra-bright colours and high-quality images on the Outside fabric; therefore, it is highly recommended for companies wishing to advertise their brands. The artificial leather does not pose any hazards to human health (according to the Health Quality certificate), there are no harmful dyes (according to an Ecological test) and it meets the required hygiene standards (according to the Hygiene certificate). Outside fabric is child-friendly, as it contains no chemical substances (REACH conformity certification) and an important feature is its non-flammable certificate. Use the beanbag chairs made of this fabric anywhere and anytime!
